# Bone Meal

Bone Meal is a premium-grade organic manure derived from finely ground animal bones, renowned for its rich nutrient content and versatility in agricultural applications. This natural soil amendment is an excellent source of phosphorus and calcium, essential nutrients that promote robust plant growth, root development, and flowering.

## Key Features:

- Rich in Phosphorus: Stimulates healthy root growth and supports abundant flowering and fruiting.
- Calcium Boost: Enhances cell wall strength in plants, promoting resilience against diseases.
- Slow-Release Nutrients: Gradual nutrient release ensures long-term soil enrichment.
- pH Balancing: Helps neutralize acidic soils, creating optimal growing conditions.
- Eco-Friendly: 100% natural and free from synthetic chemicals, ideal for sustainable farming.

## Applications:

- Vegetable Gardens: Encourages nutrient-rich harvests and robust plant health.
- Flower Beds: Supports vibrant blooms and extended flowering seasons.
- Lawns and Trees: Strengthens roots and promotes lush, even growth.
- Composting: Enhances compost nutrient content, improving its effectiveness as fertilizer.

### Usage Instructions:

- Pre-Planting: Mix Bone Meal into the soil before planting to enrich it with phosphorus and calcium.
- Top Dressing: Apply around the base of established plants for sustained nutrient release.
- Compost Additive: Combine with other organic materials to boost microbial activity and enrich compost quality.

### Packaging Options: 20 KG, 40KG PPE Bags

Available in various sizes, catering to both small-scale gardeners and commercial agricultural needs.

### Crush Sizes:

- Fine Powder: Ideal for quick nutrient release and easy soil integration.
- Medium Crush: Balances immediate and gradual nutrient availability.
- Coarse Crush: Provides extended nutrient release for long-term soil enrichment.
